

# User Acceptance / Scope and Targets

- The Cross Issue “**User Acceptance**” collects and maintains the consolidated sets of usage scenarios and user requirements for the I-centric services of the Wireless World mainly from the WWI Phase 2 Integrated Projects
- These scenarios and requirements will be used in evaluating the user acceptance for the new systems and services, and for communicating the vision of the WWI
- Ensure that WWI remains user-centric and that the requirements coming from the users (and other stakeholders) and applications/services drive the work
  - Technology acceptance
  - Added value for the users (experience/business value)

# User Acceptance / Status and Achievements

- **Interaction:**
  - Stakeholder workshops
  - User & SME interviews and user trials
  - WWI internal and external knowledge sharing
- **Reports:**
  - User Centric Design Process
  - Legal & Regulatory Framework
  - User Experience Cross Issue Document
  - Business model documents
  - Referencing of other relevant documents
- **Discussions of User Centric Architectures:**
  - Key Criteria – Design Process - Evaluation
  - Learnings from MobiLife while Applying User Centric Design
  - How to Make a System More User-Centric?
